

Your Monthly News & Updates

Brush upon your best practices and review how to talk about eVox with your patients. Plus, get ready to visit us at AAIC!

Best Practices.

What to say when patients ask about eVox testing

Patient asks: What is eVox?

You respond: The key to understanding the cause of your symptoms is to evaluate the brain itself. The eVox Brain Map is an FDA 510(k) cleared assessment that measure the way your brain functions. This information can help identify the root cause of your symptoms and help develop a diagnosis.

Patient: How does eVox work?

You respond: eVox works by measuring your brain activity through EEG. It is non-invasive and painless, and we can perform the assessment right here in the office. The data that eVox collects will reveal memory loss biomarkers that may help determine the cause of your symptoms and create a treatment plan.
