

## Evoke Has Big News!

The **NEW** Summary Report is here.

The Summary Report: **a one-page report that is clinically actionable, intuitive, and engaging.**

Now, for the first time, eVox physicians can share a concise overview with their patients. Together with the Patient Report Guide that explains each section of the report, patients can better understand their results and more actively engage in their own care.

It is now available in your Web Portal for any new patient assessments at no additional cost.

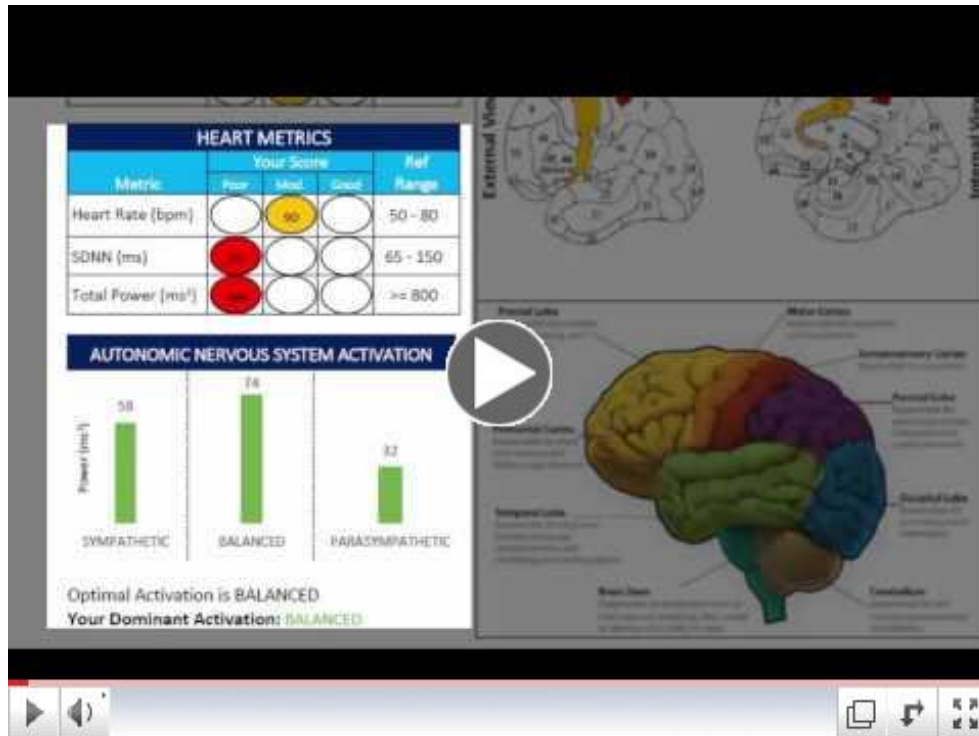

*"The launch of the Summary Report is significant. This is the*

*most intuitive and easy to use report we've ever released.*

*The Evoke team is thrilled to unveil a superior product -- one that we hope advances the use of functional brain assessment and training in primary care and specialty care practices. "*

*- Marinela Gombosov, Executive VP Operations & Marketing*

To request training or a clinical case review for the new Summary Report, contact us at [training@evokeneuroscience.com](mailto:training@evokeneuroscience.com).

## Looking for support in explaining the results to patients?

Our new Patient Report Guide takes patients step by step through each section of the Summary Report.

The guide is now available for electronic [download](#). Plus, be on the lookout in the coming weeks for the printed trifolds that will be mailed to your clinic.

To request Patient Report Guides for your office, call 917.261.6069 and ask for Anna Kuplicki
